

This series will provide information on all aspects of retiring in particular countries. The monographs are a companion series to a web site which is a developing site and which is mentioned within the book. The details covered include choosing a country, getting a visa, police clearance, income, driving conditions, climate, time differences and many other aspects vital to settling in a new place. Included also is a resource chapter which provides links to many other sites of interest. The objective is to provide the reader with maximum information at minimum cost. These books are supplements to the web site which can be taken and read once the search for a retirement haven has been narrowed to a couple or so countries. On a Kindle they can be perused when access to a web site is not possible. Books are a permanent resource. The internet can be an ephemeral phenomenon.
